

How do historians answer questions?

Powerful knowledge		Vocabulary	
		Tier 2	Tier 3
	<p>Interrogating primary sources is one of the fundamental tasks every historian must perform in order to craft an evidence-based answer to a question.</p>		
	<p>1. When was this source created? If the source is not dated, can you use any contextual clues to make an educated guess?</p>		
	<p>2. Who created it? If no individual's name is there, can you guess who they were?</p>	<p>Useful Intent Accurate Inaccurate Purpose</p>	<p>Context / contextual Bias Propaganda Primary Contemporary</p>
	<p>3. What was the original purpose of this source? Why was it created and what was its intent? 4. Who is the intended audience of the source? How does this influence the way information is presented?</p>		
	<p>5. Does the source agree with what you know about the event/person/time period? If it disagrees, is there a reasonable argument that it is inaccurate?</p>		

Is the climate really changing?

Powerful knowledge		Vocabulary	
		Tier 2	Tier 3
	<p>17 of the 18 hottest years on record have taken place since 2001.</p>		
	<p>Glaciers are retreating everywhere around the world. Many have disappeared completely.</p>	<p>Sceptic</p>	<p>Climate change</p>
	<p>There have been a record number of extreme weather events in the last decade alone.</p>	<p>Evidence</p> <p>Influence</p>	<p>Trend</p> <p>Extinct</p> <p>Glacier</p> <p>Adaptation</p>
	<p>The Earth's climate has always gone through periods of cooling and heating. The Earth's orbit naturally changes over time, bringing it closer to the sun for a time. Animals and plants can adapt to the changing climate.</p>		

How can we develop *sustainably*?

Powerful knowledge		Vocabulary	
		Tier 2	Tier 3
	<p>Economic development that is conducted without depletion of natural resources, is socially fair and economically sustainable.</p>		
	<p>Generate power for use without damaging the environment. They release no carbon dioxide. Farming and other land uses can happen simultaneously.</p>	<p>Conduct Deplete Simultaneous</p>	<p>Sustainable Development Economic Natural resources</p>
	<p>Green spaces are essential to developed urban areas. They filter the air, provide space for play and relaxation and cool the city environment.</p>		
	<p>The fashion industry causes 10% of greenhouse gas emissions (more than flying). 1kg of denim required 10,000 litres of water (about 10 years' worth of drinking water for one person).</p>
